2015 VOLVO XC90 ENGINE LINE-UP REVEALED

The all-wheel-drive seven-seater XC90 promises drivers up to 400PS of power. With a 2.0-litre four-cylinder turbocharged and supercharged engine powering the front wheels and an 80PS electric motor driving the rear axle, the combined output stands at 400PS and 640Nm and the vehicle will have an all-electric range of up to 40km. The new XC90 will also be offered with an array of four-cylinder Drive-E engines which includes a D5 twin-turbo diesel delivering 225PS of power and 470Nm of torque. 190PS, 254PS and 320PS engines round off the XC90 line-up. There seems to be an engine to suit all requirements.
